PROFESSIONAL SUMMARY

Node.js Developer with over 3 years of experience in crafting and deploying scalable web applications and RESTful APIs. Proficient in JavaScript (ES6+), Node.js, Express.js, and MongoDB, with a strong emphasis on backend development and database management. Expertise includes API integration, authentication, performance optimization, and blockchain functionality, encompassing wallet interactions, smart contract execution, and comprehensive data handling. Committed to contributing to impactful projects in a backend-focused role while continuously enhancing technical skills and industry knowledge.

SKILLS

Proficient in JavaScript (ES6+)	Backend development with Node.js and Express.js , Reactjs
RESTful API development	Experienced with MongoDB databases
API testing with Postman	Collaboration using Git and GitHub
Proficient in using Chatgpt, Gemini AI, and Claude	Proficient in Didit KYC, SendGrid, PaymentGetways (stripe , paypal , razorpay) and Twilio integrations
Payment gateway integrations like stripe , PayPal	Blockchain function integration in Node.js
Prepare documents of project for client	Effective client communication
Effective time management	MySQL database basics

WORK EXPERIENCE

Software Developer, 09/2023 – 06/2026

Virtual Height IT Services Pvt. Ltd – Ahmedabad, India

- Developed scalable RESTful APIs using Node.js and Express.js for multi-platform applications (Android, iOS, and Web).
- Built and optimized MongoDB schemas, ensuring high-performance data storage, indexing, and retrieval.
- Integrated third-party APIs, including paypal, Stripe and DIDIT for identity verification.
- Implemented secure authentication & authorization using JWT, OAuth2.
- Built email automation pipelines using SendGrid for onboarding, notifications, and transaction updates.
- Managed code quality with Git, handling branching strategies, pull requests, version control, and conflict resolution.

- Worked on blockchain integrations, including wallet creation, smart contract interaction, on-chain/off-chain functions, and token transactions.
- Ensured best practices in API security, rate limiting, input validation, and error handling.

- **Key Projects:**

- 1. Social Media App (Instagram + TikTok + PK Battle + Myntra-Style Shopping)**

Node.js, Express.js, MongoDB, Stripe, DIDIT API

- Developed complete backend APIs for feed, reels, PK battle, follow system, creator monetization, and in-app marketplace.
- Built identity verification flow using DIDIT API for creator KYC.
- Implemented Stripe payment gateway for shopping and creator payouts.
- Optimized media upload handling using signed URLs and compression logic.
- Maintained scalable architecture to support high-traffic video reactions and real-time interactions.

- 2. Rooms of Intimacy (Couples Game – Windows & macOS)**

Node.js, Payment Integration

- Developed backend logic for couple challenge flows, point systems, and personalized game logic.
- Integrated payment APIs for subscription access and premium features.

- 3. MVP-Escrow (Crypto Escrow Application)**

Node.js, Web3.js, Smart Contracts

- Implemented escrow logic enabling **secure crypto payments** between two parties with admin oversight.
- Managed smart contract interactions to hold, release, and dispute funds.
- Built admin APIs for payout decisions and KYC-based verification.

- 4. Ad-MVP (Crypto Transfer + Swapping Without Gas Fee)**

Backend Developer | Node.js, Web3.js, Ethereum, Smart Contracts

- Built APIs enabling gas-less transactions, token swapping, and multi-currency transfers.
- Integrated wallet creation logic, smart contract functions, and blockchain event listeners.
- Managed on-chain/off-chain sync for balance updates and transaction validation.

- 5. PMS – Employee Management System (In-House Project)**

Node.js, Express.js, MongoDB

- Developed modules for attendance, payroll, leave management, performance tracking, roles & permissions.
- Implemented secure login, multi-role access, and automated email workflows.

NodeJs Trainee, 06/2023 - 08/2023

Virtual Height IT Services Pvt. Ltd – Ahmedabad, India

- Completed an in-depth 3-month training program covering JavaScript fundamentals, Node.js runtime architecture, Express.js framework usage, and MongoDB database operations. Learned to build and

deploy backend APIs, write modular server-side code, manage database CRUD operations, work with middleware, and test APIs using tools like Postman.

Career Break, 03/2022 - 04/2023

- **Family Business Manage – Imitation Jewellery (March 2022 – August 2022)**

Managed daily operations of a family-owned imitation jewellery business, including inventory handling, customer coordination, supplier communication, and sales operations. Gained practical experience in business management, decision-making, and operational responsibilities.

- **Master's Program (September 2022 – December 2022) – London, UK**

Enrolled in a Master's degree program and completed initial coursework. The program was discontinued due to health-related challenges associated with the local environment.

Project Assistant, 08/2020 - 02/2022

Ganpat University(GUNI), Mehsana, – Gujrat, India

- Maintained the university's events website, ensuring accurate updates, content publishing, and smooth functionality.
- Created and updated website content for various university departments and academic activities.
- Managed documentation and reports related to students' academic projects, ensuring proper organization and compliance with guidelines.
- Reviewed and evaluated student project work, providing guidance, feedback, and technical support.
- Conducted lab sessions and lectures for first-year students, delivering foundational training and academic support.

EDUCATION

Bachelor: Computer Engineering, 01/2020

Apollo Institute of Engineering And Technology - Ahmedabad

- Disciplinary profile : Bachelor of Computer Engineering(7.0 CGPA in 2020)
- University : Gujarat Technology University (G.T.U), Ahmedabad
- College/Institute : Apollo Institute of Engineering and Technology Ahmedabad(A.I.E.T)
- GPA: 7.0 CGPA
